Product Features

S03 fill light is a portable pocket fill light. There are multiple high color (positive white + warm white) and high-quality RGB light beads. It has the advantages of low energy consumption, stable color temperature, energy and power saving, long service life, and compact size and convenient carrying. It can be adopted in various scenes and perfectly used in photography, video and vlog recording, live broadcasting and so on.

Product features

- Connecting to the wireless Bluetooth.
- There is high-quality soft light diffuser, and no need to use any other accessories. It is easy to achieve soft light effect.
- It can be adjusted within 0 to 360° color range and the color saturation freely.

⚠ Attention

1. Do not directly shine the fill light in other' s eyes at close range.
2. Do not make the body part subject to strong vibrations, otherwise failures may occur and the original may be damaged.
3. Do not try to disassemble or repair the fill light by yourself, otherwise failures may occur.
4. Do not place the product in the sun at noon or in the heat, otherwise damage might occur.
5. Do not cover the light with any object that hinders heat dissipation. Excessive heat will shorten the service life of LED lamp beads.
6. Do not soak the fill light in water or expose it in the rain or moisture unless it is protected appropriately from liquids and moisture. If there' s water in the product, the light might be on fire or electrical leakage might occur. In this case, the power shall be turned off immediately.

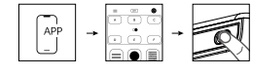
连接方式二：

1.先打开手机APP,设置需要的频道号与组号，再开启补光灯，补光灯将匹配连接已设置好的频道号与组号。



电量显示指数

因补光灯未设置屏幕，可根据补光灯呼吸灯的显示，判断该补光灯的电量状态。

绿灯
不闪动
100%电量

绿灯
开始闪动
75%电量

绿灯
快速闪动后停止闪动
一段时间后关机
10%电量

请注意：

1.低电量状态，功率大小不会因为电量低改变但需要立即连接充电,避免关机影响使用。
2、在关机状态下连接充电线，红灯亮表示电池正在充电，不显示灯光表示充电完成。
3. 当电池电量低时，连接充电线并打开补光灯。此时，补光灯电池将不能蓄电，只能供电。
